

std::false_type

```
graph BT; A["tesseract_common::got_type< A, typename >"] --> B["std::false_type"]
```

A diagram showing a relationship between two C++ type names. At the bottom is a light gray rectangular box containing the text `tesseract_common::got_type< A, typename >`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text `std::false_type`. This indicates that `tesseract_common::got_type` inherits from or is a specialization of `std::false_type`.

tesseract_common::got
_type< A, typename >
