

tesseract_collision
::ConvexDecomposition

```
graph RL; A["tesseract_collision::ConvexDecompositionHACD"] --> C["tesseract_collision::ConvexDecomposition"]; B["tesseract_collision::ConvexDecompositionVHACD"] --> C;
```

The diagram illustrates inheritance relationships between three C++ namespaces. On the left is a gray-shaded box representing the base namespace: `tesseract_collision::ConvexDecomposition`. To its right are two white boxes representing derived namespaces. The top box is `tesseract_collision::ConvexDecompositionHACD`, and the bottom box is `tesseract_collision::ConvexDecompositionVHACD`. Blue arrows point from each of these two derived namespaces towards the base namespace, indicating that both `HACD` and `VHACD` inherit from the base `ConvexDecomposition` namespace.
